

Features

- 3.3V, 5V, 12V, 15V and adjustable output versions
- Adjustable version output voltage range,
- 1.23~37V±3% max over line and load conditions
- Guaranteed 3A output current
- Wide input voltage range
- Requires only 4 external components
- 52KHz fixed frequency oscillator
- TTL shutdown capability, low power standby mode
- Uses readily available standard inductors
- Thermal shutdown and current limit protection

Applications

- Simple high-efficiency step-down (buck) regulator
- Efficient pre-regulator for linear regulators
- On-card switching regulators
- Positive-to-negative converter (buck-boost)

Package Pin Out

Pin Assignment of TO220 and TO263

Pin	Name
1	VIN
2	OUTPUT
3	GND
4	FB
5	ON/OFF

General Description

The LD6712 series of regulators are monolithic integrated circuits that provide all the active functions for a step-down (buck) switching regulator, capable of driving 3A load with excellent line and load regulation. These devices are available in fixed output voltages of 3.3V, 5V, 12V, 15V and adjustable output versions. Requiring a minimum number of external components, these regulators are simple to use and include internal frequency compensation and a fixed-frequency oscillator.

The LD6712 series offers a high-efficiency replacement for popular three-terminal linear regulators. It substantially reduces the size of the heat sink, and in some cases no heat sink is required. A standard series of inductors optimized for use with the LD6712 are available from several different manufacturers. This feature greatly simplifies the design of switch-mode power supplies.

Other features include a guaranteed ±4% tolerance on output voltage within specified input voltages and output load conditions, and ±10% on the oscillator frequency. External shutdown is included, featuring 50µA (typical) standby current. The output switch includes cycle-by-cycle current limiting, as well as thermal shutdown for full protection under fault conditions.

Ordering Information

Part No.	Package	Packing Options	
		Tube (TU)	Tape & Reel (TR)
LD6712	SOP-8	LD6712S1-000-TU	LD6712S1-000-TR
	TO220-5L	LD6712T4-000-TU	LD6712T4-000-TR
	TO263-5L	LD6712T9-000-TU	LD6712T9-000-TR

- Package material default is "Green" package.

Output Voltage Selection

Part No.	V _{OUT}
LD6712S1-000-XX	Adjustable
LD6712S1-033-XX	3.3V
LD6712S1-050-XX	5.0V
LD6712S1-120-XX	12V
LD6712S1-150-XX	15V

Absolute Maximum Ratings

Parameter	Maximum	Unit
V _{IN} supply voltage	45	V
Operating V _{IN} supply voltage	5.1 to 40	V
ON/OFF pin voltage	-0.3 ≤ V ≤ V _{IN}	V
FB pin voltage	-0.3 ≤ V ≤ V _{IN}	V
OUTPUT pin to GND	-0.8	V
Operating current load	3.0	A
Junction temperature	150	°C
Operating temperature range	-40 to +125	°C
Storage temperature range	-65 to +150	°C
Power dissipation	Internal limited	

The values beyond the boundaries of absolute maximum rating may cause the damage to the device. Functional operation in this context is not implied. Continuous use of the device at the absolute rating level might influence device reliability. All voltages have their reference to device ground.

Electrical Characteristics^{*1}

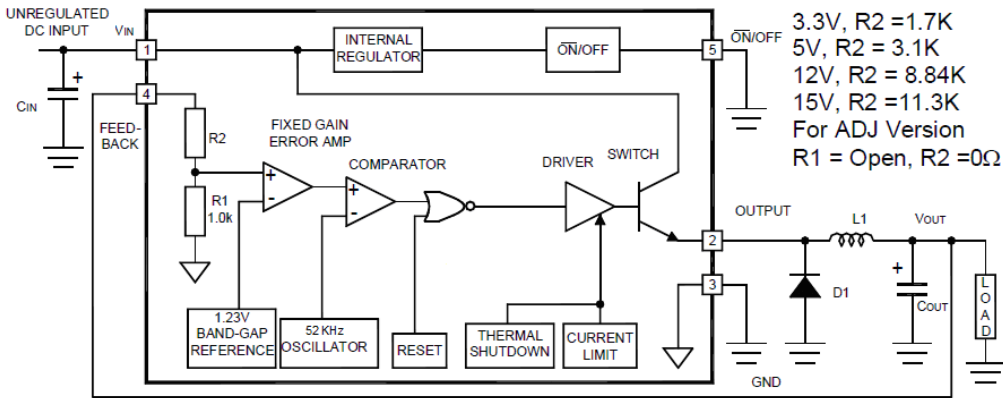

V_{IN}=12V for 3.3V, 5V; V_{IN}=25V for 12V, 15V and adjustable version, I_{LOAD}=0.5A, T_A=25°C unless specified

	I _{IL}	V _{ON/OFF} =0V(on)	–	0	10	μA

Notes:

1. External components such as the catch diode, inductor, input and output capacitors can affect switching regulator system performance.
2. Output pin sourcing current. No diode, inductor or capacitor connected to output.
3. Feedback pin removed from output and connected to 0V.
4. Feedback pin removed from output and connected to +12V for the Adjustable, 3.3V, and 5V, versions, and +25V for the 12V and 15V versions, to force the output transistor OFF.
5. VIN =40V.
6. The oscillator frequency reduces to approximately 36 kHz in the event of an output short or an overload which causes the regulated output voltage to drop approximately 40% from the nominal output voltage. This self protections feature lowers the average power dissipation of the IC by lowering the minimum duty cycle from 5% down to approximately 2%.
7. This applied over full operation temperature range.
