## General Description

The LD7602 is a cost-effective linear regulator optimized for high input voltage. It regulates to supply a constant current of 25mA $\pm$ 7.5% at input voltage of 8V to 120Vdc. The Device can be used as a constant current source or a constant current sink.

The typical application of LD7602 is to drive a string LED with a constant current 25mA. The parallel connection of LD7602 can be used to provide higher constant current. However, total constant current higher than 100mA is not encouraged.

For a wider application, the package is available in TO-92, SOT-89, TO-252.

## Absolute Maximum Ratings

Parameter	Maximum	Units
Maximum Operating Voltage	130	V
Operating Junction Temperature	-40 to +125	°C
Storage Temperature	-55 to +150	°C

The values beyond the boundaries of absolute maximum rating may cause the damage to the device. Functional operation in this context is not implied. Continuous use of the device at the absolute rating level might influence device reliability. All voltages have their reference to device ground.

## Electrical Characteristics

T<sub>A</sub>=25°C unless specified, otherwise minimum and maximum values are guaranteed by production testing requirements.
